

**LASA & HAM (High-Alert Medications) Identification System**

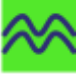

Following the success of our Labelkit MCD system for convenient and effective drug labeling in the Operating Room, we are pleased to introduce a new range of Labelkit MCD conceived specifically to help identify LASA (Look Alike Sound Alike) and High Alert drugs. With a modular dispenser made of 4-8 cartridges, each hospital department can easily label and then safely identify the boxes of LASA drugs in use. LASA labels are supplied in handy Modular Cartridge Dispensers (Picture 2) and are available in different sizes and types for general or specific alerts according to Hospitals needs.

They can be positioned on drug boxes, syringes, bottles and drips. Our LASA Labelkit Cartridges have been developed in co-operation with some major european hospitals in accordance with the recommendation from the respective Ministry of Health. They are made in a convenient size so as not to cover writings on the original drug box and are in fluorescent colors to draw the operator's attention. A removable adhesive is used to preserve the box in case any drug need to be returned. The assembled dispenser can be hung on rail or wall thanks to the special designed supports. (Picture 1)
